Holberton School   San Juan, Puerto Rico
Software Engineer - Foundations   *February2022* - present
- Currently in a 9-month program focused on the foundations of computer science and software engineering, including low-level programming & algorithms, high-level programming & databases, and system engineering & networking
- Relevant projects: AirBnB Clone, Not So Simple Shell, Printf and Search Algorithms

Universidad Interamericana Ponce   **Ponce**, PR
Bachelor in Business Administration   *August* 2013 – May 2017
- Bachelor in Business Management skills, as well as marketing strategies and knowledge.

PROJECTS

AirBnB Clone
A replica of AirBnB built with Python and MySQL on a Nginx server   *September* 2022

- Simple command interpreter to manipulate data without a visual interface, made for use with development and debugging
- Completed a website for the front-end, which shows both static and dynamic content

Not So Simple Shell
A replica of Shell built in C   *May 2022*

- Developed a command interpreter that operates just like Shell, with the use of system calls and has no memory leaks

WORK EXPERIENCE

Alight Solutions   San Juan, Puerto Rico
Customer Service Rep./ 401k-Retirement plan specialist   May 2020- February 2021
- Provide telephone customer service as retirement plan and 401k specialist for companies Allstate and Equitable.
- Provided 401k rollovers
- Change investment options for employees with funds in their respective retirement plan, as well as any changes to their contribution rates they desired.
